

I.D. GLOBAL

Introducing I.D.GOBAL™ - tracking technology with DNA accuracy

Now you can mark all your assets easily and prove ownership beyond the shadow of a doubt. ToolWatch has partnered with Sure Trace® to make your ToolWatch system work even smarter. Of course our goal is to increase your bottom line, but this forensic theft detection program delivers the following benefits as well:

- Profitability "proven strong ROI data"
- Heightened security
- Easy application
- Guaranteed product authentication
- Full mobility of assets
- Customization option for labels
- Support documentation for litigation

The brains behind the brawn

Because I.D.GLOBAL is a blend of technology and psychology, your start-up Express Kit comes complete with everything you need to establish a powerful and comprehensive theft prevention program, including:

- Security Fluid - 60ml
- UV Security Detection Light
- 500 Security Labels
- 4 - 5" WARNING Signs
- 2 - 10" WARNING Signs
- Surface Prep
- Test Fluid
- "Red Book" - Theft Awareness Book
- CD containing Awareness Brochures
- Program Installation Manual
- Code Registration Card
- Carrying Case

Outsmart a thief in 3 easy steps

From marking your tools and equipment with a custom-coded forensic solution to creating awareness of your new “detective” both inside and out of the company, this program is easy to install and maintain. Here's how it works:

1 Brush a small amount of I.D.GLOBAL fluid onto each item, or dab a drop on the custom-coded label to increase awareness with a visual warning of protection

2 Create awareness by posting warning signs inside buildings, on tool crib doors and at gate access areas, and inform your entire staff of the new I.D.GLOBAL program.

3 Perform random, public asset “checks” with portable UV detection light and check tool bags and trucks at gates so that “walking” tools are immediately spotted by guards/cameras

Where should you plant an automatic detective?

Whether it's a UV light at access areas or awareness stickers inspiring “honesty,” it's likely that I.D.GLOBAL has a valuable place in your organization. Contact your ToolWatch representative today to put a forensic eye on your assets.

* Through its wholly owned subsidiary, I.D.GLOBAL, Sure Trace manufactures and sells proprietary security products for asset protection and brand authentication markets.

** Only hand-held UV light is included in the start-up kit. Larger, permanent models are available for purchase at www.identex.net.
