## Maximize the return on your ToolWatch investment with a personalized JumpStart implementation program

**TOOLWATCH** *go for fast*

*"Having someone there who knows the program inside and out was invaluable. ToolWatch tailored our JumpStart session to our needs, focusing on functions that would be most useful. We are using ToolWatch effectively because of this comprehensive implementation session."*

**Jeff Moryn**  
Information Technology Director  
Parsons Electric Company  
Minneapolis

Wouldn't it be great if you could integrate your tool management system quickly and successfully and get the maximum benefits from ToolWatch?

Now you can with JumpStart, a personalized service designed to help you thoroughly understand your ToolWatch software and equipment and ensure a smooth transition from purchase to implementation.

We know the success of your tool management system hinges on the success of your implementation. That's why we'll go to great lengths to guarantee your satisfaction. With JumpStart, our dedicated team of experienced professionals will come right to your site to help you implement your ToolWatch software and equipment.

Whether you're a growing company with a few hundred tools in a single warehouse or a large organization with thousands of tools in locations across the country, our team will help you institute best practices and develop a template for success. In just 3-4 days, you and your staff will gain greater comfort, confidence and familiarity with ToolWatch. You'll not only save time and money, you'll also increase your efficiency.

## What to expect from JumpStart

**TOOLWATCH** *go far fast*

### We Guarantee Your Satisfaction

*In fact, we're so sure you'll achieve the results you expect, we guarantee your 100% satisfaction:*

*If, by the time we leave your site, you're not absolutely certain you have everything you need to complete the implementation process and operate your system successfully, we'll give you your money back on JumpStart and ToolWatch. Your ToolWatch software will be uninstalled and all applicable materials collected by us at our expense. That's how thrilled we want you to be with JumpStart.*

*For more information about our program or about our money back guarantee, talk to your ToolWatch representative today and JumpStart your tool management system!*

In our consultation with you, we'll talk to you in-depth to learn about your business, identify your JumpStart objectives, determine your project expectations and develop a personalized implementation plan just for you.

Next, we'll help you identify the ideal team - from warehouse and tool room employees to accounting and management staff - to help assure a successful implementation. We'll even design an implementation strategy, gather legacy data and configure your software to help you get the most from our visit.

Once on site, your JumpStart team will work side-by-side with you, covering all the essentials you need to get started. We'll help you:

- 1 Identify, number and label** as many tools as possible so they're ready for you to use right away.
- 2 Review your existing procedures and incorporate best practices** to help you maximize the benefits of your ToolWatch system.
- 3 Train all necessary personnel** – including warehouse workers, equipment managers, and accounting staff – to develop the expertise they need to thoroughly understand the system.
- 4 Go live** - Start assigning tools and printing reports using your own live data.
- 5 Monitor your live transactions on site** to ensure your new processes are working to deliver results.

By the time we leave, you and your staff will be comfortable with your system and have the knowledge, guidelines and procedures you need to continue growing your ToolWatch system successfully on your own.
