

TOOLWATCH

LIVE WEBINAR TRAINING

Field & Warehouse Apps Agenda

The ToolWatch Field & Warehouse Apps are an abridged version of ToolWatch Enterprise designed for mobile applications. In this course you will learn such things as: basic navigation skills, how to search for tools and materials, creating new items, how to transfer items, creating requisitions, using pick tickets and more! This includes tasks geared towards a wide range of uses, focusing on field and warehouse settings. The class is conducted as a live, online, instructor-led session along with post-training Technical Trainer access designed to enrich your learning experience.
